WORK EXPERIENCE

Mediacle Technologies, Web Developer 09/2025 – Present
Bangalore

Seldom Technologies Pvt Ltd., Software Associate Engineer 04/2024 – 09/2025
Mangalagiri

INTERNSHIPS

Jr. Web Developer Intern, Seldom Technologies 01/2024 – 03/2024

I have worked on more than 15+ front-end projects, which has given me practical experience. My responsibilities included frontend coding as well as UI/UX design (Figma), utilizing JavaScript, HTML, CSS, and React .

Salesforce Developer Virtual Internship, Salesforce

Web Development, Global Education Technology

SKILLS

Python | HTML | CSS | Bootstrap | Tailwind | Javascript | JQuery | ReactJS | Angular |
Node Js | MySQL | Wordpress | Figma | Power BI | PHP | Alpine Js | REST APIs | Docker |
Excel

PROJECTS

WhatsApp Appointment Booking Bot, PHP , Node JS , Laravel

Use PHP and Laravel for backend development, integrate Twilio API for WhatsApp messaging, and employ Ngrok for local server exposure. Utilize Node.js for additional functionalities and real-time processing.

Expense Tracker, Angular, Firebase, Tailwind

Expense Tracker application using Angular for the frontend and Firebase for real-time data storage . The app enables users to manage expenses with CRUD operations and cloud-based data synchronization

Task Manager, Angular

Allows users to create Tasks with a name and status (Todo, Inprogress, or Completed), displays them in their respective status containers, and enables status transitions.

Currency Converter, Reactjs, REST APIs

Built a responsive Currency Converter app in React that fetches real-time exchange rates using REST APIs

Mealfinder App, HTML , CSS , Javascript , APIs

Recipe search app that uses public food APIs to help users discover meals based on meal type. It fetches real-time data like meal names, images, instructions, and ingredients through API calls.

Weather App, HTML , CSS , Bootstrap , Javascript , JQuery , APIs

Weather App fetches real-time weather data from external APIs based on the user's location Input. It displays current temperature, conditions, and forecasts using services like OpenWeatherMap or WeatherAPI.

Flipkart Review Sentiment Analysis, Python , ML Model

This project aims to extract insights from customer reviews on Flipkart. Using Python and ML techniques, we analyze the sentiments expressed in these reviews to provide valuable insights for customers and businesses.

HRMS Application Design, Figma

Designed a scalable HRMS application in Figma using structured components, auto-layouts, and reusable design systems. Implemented interactive prototypes and consistent UI patterns to enhance user experience.

CERTIFICATES

Certification on Data Science
